NOVA COLLECTION

INTRODUCTION

Sober and minimalist, NOVA is the result of an interconnection of pure geometrical shapes, a product of customized research in ergonomic workspaces and an integration of audiovisual cutting-edge technology.

At NOVA, mineral and fabric-covered blocks coexist in an incomparable arrangement, creating a natural and dynamic atmosphere; with a minimal design, the shapes are stripped down to its bare essentials, revealing the true essence of modern architecture within your collaboration spaces.

NOVA COLLECTION

VIDEOMOBILE

Mobility and flexibility are the key words to understand NOVA VideoMobile. Mounted on casters, they allow you to reconfigure your collaboration spaces according to your needs. Indeed, you will be able to change your layout and customize not only within a room, but also from one room to another.

As a result of inner cable management, hidden casters and technology integration, our product keeps its outstanding design far away from any visual contamination, ensuring that your meeting rooms will look like no other.

To optimize your experience of mobility, NOVA VideoMobile provides an optional battery system, allowing a wireless option and facilitating free movement due to its 8 hours of autonomy.

Movable VideoMobile allows the space to be easily transformed.

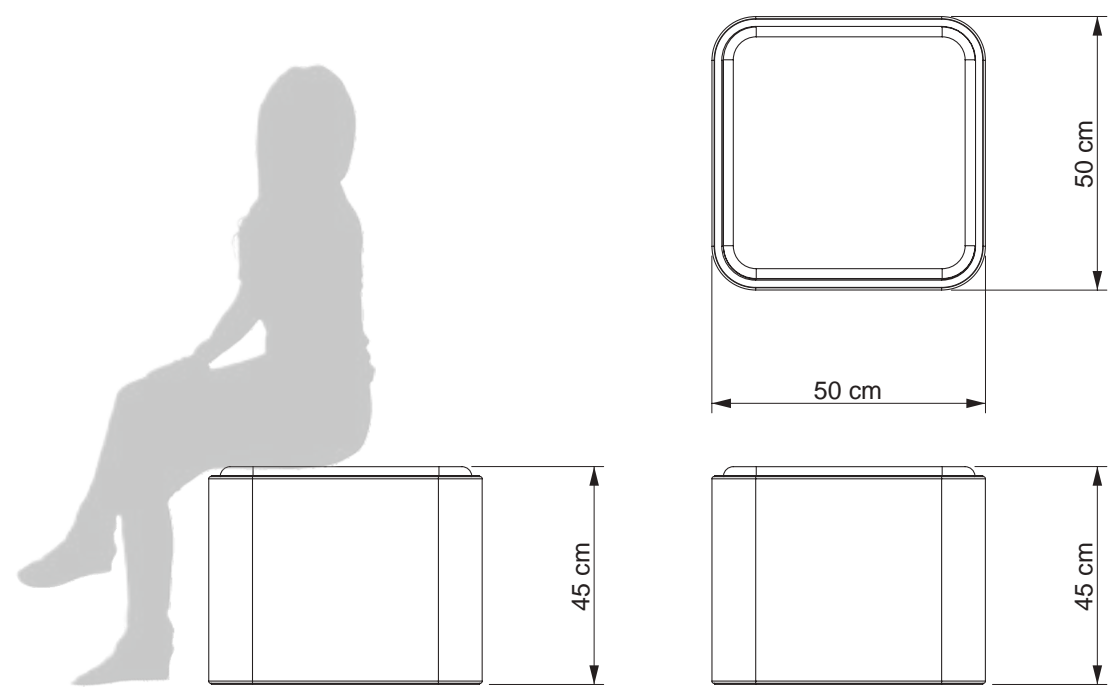

NOVA COLLECTION

SEATS

NOVA seats will bring modularity within your meeting rooms and polyvalent spaces. Their ability to be stacked and mixed will allow you to modify your spaces quickly and easily.

Thanks to the reversible lid, the NOVA seats offer a series of different arrangements, not only with the colour combinations but also because the plywood on one side allows you to use the surface as a table or a footrest.

NOVA seats are designed to blend in with the NOVA universe and will be the last touch to perfect your collaborative spaces.

TABLES

Whether narrow or wide, long or short, you will be able to fully enjoy your collaborative space thanks to our NOVA tables. Our tables are available in many configurations with a capacity of 4 to 12 people.

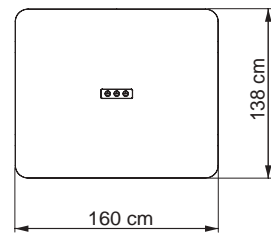

The inner cable management and the installation for the connections have been the key focus on this product, providing you a clean and fully functional design without the classic wire mess.
